What Is The Best Method To Collect Thousands Of Business Listings Details From Yellow Pages?

Yellow Page is a reliable source for extracting information regarding local businesses such as Restaurants, Shops, Home Services, Automotive Services, etc. Yellow Pages is one of the **largest business directory** websites on the internet. According to the **Yellow Pages Company**, more than 80 million people visit their website monthly in which approximately **20 million businesses** are listed. But how do you accurately and quickly collect this information in a useful format? After all, Yellow Pages does not have a simple "export" feature to **collect all the business information** you might need. What could you do if you had access to the Yellow Pages database? Would you build niche directory websites? Would you use this data for your **marketing campaigns**? What if I told you that there is a way that you can easily gain access to the same data that is on the Yellow Pages website. The tool you are looking for is a **Yellow Pages Extractor** and it just so happens that you are in the right place. You can use web scraping tools to extract details **like phone numbers, reviews, address**, etc. Yellow Pages Extractor is the best **Yellow Scraper Tool** available in the market for scraping thousands of business listings from Yellow Pages with just a single click.

Build Your Own Database from Yellow Pages with Yellow Pages Extractor for Marketing Purposes

Yellow Pages Extractor crawls all the listings related to your keyword/business from multiple pages of Yellow Pages. **Yellow Pages Extractor** is an automated data extraction tool for Yellow Pages. It extracts the most relevant data and allows saving it **to Excel or CSV file.**

You can search and collect thousands of business details matching a chosen keyword/profession within any location globally! **Yellow Pages data extractor** allows you to scrape business listings by entering keywords or category, city/state, and give the list of business details listed on the Yellow page's website. No need to **hire an expensive programmer** and no need to pay data scraping companies for completed databases. With **Yellow Pages Scraper** you are in full control. You can **scrape a huge amount of data** with the press button. This Yellow Pages Extractor works at all versions of Yellow Pages USA and International.

Who Can Use This Yellow Pages Extractor Software?

Yellow Pages Extractor works well with SEO tools, CRM recruiter systems, sales leads management tools or email and telemarketing campaigns. **Lead generation companies and freelancers** can also use these data scraping tools. Yellow Pages Scraping and data downloading is made easy with the Business leads Extractor tool. Furthermore, you have data security and privacy as the scraped data does not leave your browser.
